

Here is a confirmation of the number of row counts in `rets_property` and `california_sold` in MySQL:

```
mysql -u root -p idx_exchange -e "SELECT (SELECT COUNT(*) FROM rets_p
roperty) AS active_listings, (SELECT COUNT(*) FROM california_sold) A
S sold_comps;"
(base) arjunbaronia@Arjuns-MacBook-Air ~ % mysql -u root -p idx_excha
nge -e "SELECT (SELECT COUNT(*) FROM rets_property) AS active_listings, (SELECT COUNT(*) FROM california_sold) AS sold_comps;"
Enter password:
+-----+-----+
| active_listings | sold_comps |
+-----+-----+
|           53122 |       87157 |
+-----+-----+
```

Here, the agent receives and sends some test messages on WhatsApp:
